SUMMARY

I am a **Full-Stack developer** with a passion for creating seamless and intuitive web and mobile apps, coupled with robust and scalable backends.

EXPERIENCE

Full Stack Specialist

BaKhabar Kissan (BKK)

Jun 2024 – Present

As a Full Stack Developer at Bakhbar Kissan, I design, implement, and maintain product features using React.js, Tailwind CSS, and Redux on the front end, with Node.js, Express, and Objection.js ORM for MySQL and PostgreSQL on the back end. My role includes deploying the latest builds to company servers, ensuring seamless integration and performance. I focus on delivering high-quality, scalable solutions that meet the company's requirements and objectives.

Full Stack Developer

Metavystic

May 2023 – May 2024 . 1 yr . 1 mo

- I develop frontend of company projects using Reactjs and Nextjs with Tailwind CSS and backend using NodeJS with Express and Sequelize
- Deploying their project on AWS server is also included in my job responsibility.

Front End Developer

Agromonics Pvt. Ltd.

Jun 2022 – May 2023 . 1 yr

I started working as a front-end developer and made websites using Next.js and Tailwind CSS. Later, I also worked on the back-end, creating APIs with Node.js, Express, and Sequelize ORM. Plus, I helped put some of our projects on Linux servers.

PROJECTS

- **My Telenor App Web View (Khushaal Watan):** 06/2024 – Continue, It's a Telenor service which is related to farmers of Pakistan. It can be accessed through **Telenor Application**, in **News & Updates** section or directly through **7272.pk** url. I developed all the frontend of this web view using Reactjs framework and tailwind css for styling currently I am working on its Desktop view. Deployment of it is also part of my job.

- **Removefrom Dashboard:** 12/2022, 01/2023, This is the dashboard designed for my client, where they can submit, edit, and delete links. Two dashboards have been created, one for the user and the other for the admin. The user dashboard has limited access, while the admin dashboard provides unrestricted access to admin.
- **myCabTogo:** 06/2022, 07/2022, myCabToGo is a mobile application that offers convenient and reliable cab services to customers. As part of the development team, I designed the application's front-end using the React- Native JavaScript framework.
- **KidzQuran:** 01/2022, 03/2022, I developed Kidzquran's front-end using NextJS with Tailwind CSS. I also build its admin panel using ReactJS with Tailwind CSS to display student's and teacher's details. The platform's backend is being developed using NodeJS, MySQL database, and Sequelize.
